SUMMARY

Computer Science student with hands-on experience building AI-powered automation systems, workflow solutions, and LLM-based applications using Python, APIs, and modern AI tools. Experienced in developing practical solutions that improve efficiency, automate repetitive processes, and support data-driven decision-making. Interested in applying AI and automation technologies to solve engineering workflow challenges at scale.

EDUCATION

California State University, Sacramento
Bachelor of Science in Computer Science

Jan 2023 – Present

Coursework: Machine Learning Concepts, Artificial Intelligence fundamentals, Software Engineering, Database Management Systems

TECHNICAL SKILLS

Programming: Python, JavaScript, Java, SQL (Basic)
AI & Automation: OpenAI API, ChatGPT, Claude, Prompt Engineering, Workflow Automation, Multi-Agent Systems
Data & Analytics: Pandas, NumPy, Scikit-learn, Data Preprocessing, Feature Engineering
Systems & Tools: REST APIs, FastAPI, Git/GitHub, Docker (familiar)
Cloud & Storage: AWS (familiar), Google Cloud (familiar), JSON, structured data modeling

EXPERIENCE

Student Lead | Aramark, Sacramento

May 2023 – Dec 2025

- Coordinated daily operations and supported workflow activities in a fast-paced environment.
- Collaborated with team members and supervisors to maintain efficient processes and resolve operational issues.

Tech Support & Operations | OYO Hotels

Jan 2022 – Nov 2022

- Assisted with technical troubleshooting, reporting, and operational documentation.
- Supported workflow consistency through structured record keeping and communication.

PROJECTS

AI Workflow Automation System | JavaScript, n8n, Python, APIs

- Developed AI-powered workflows that automatically collect, process, classify, and summarize information from multiple APIs and data sources using LLMs and automation tools.
- Designed reusable pipelines with validation, logging, and structured outputs to reduce manual effort, improve consistency, and streamline reporting workflows.

Multi-Agent AI Task Runner | Python, LangGraph (familiar), OpenAI API

- Built a lightweight multi-agent system where specialized AI agents collaboratively handled planning, research, execution, and validation tasks to automate complex workflows.
- Implemented orchestration logic, prompt chaining, and structured reasoning techniques to improve task coordination, reliability, and workflow efficiency.

ApplyBuddy-AI | Python, Streamlit, OpenAI API, PyPDF, python-docx

- Built an AI-powered job application assistant that analyzes resumes and job descriptions to generate tailored resumes, cover letters, recruiter emails, LinkedIn outreach messages, and interview preparation materials.
- Developed automated matching and optimization workflows using OpenAI APIs and document-processing tools, reducing manual application preparation time while improving consistency and personalization.

Golf Swing Analyzer | Python, FastAPI, OpenCV, MediaPipe, React

- Developed a full-stack AI application that analyzes golf swing videos using computer vision and pose estimation to extract biomechanical metrics such as tempo, rotation, and stability.
- Built FastAPI services and interactive visual overlays that transform raw motion data into actionable performance insights and user-friendly feedback.

ML Stock Analysis Assistant | Python, Pandas, scikit-learn, CLI

- Built data preprocessing and feature engineering pipelines for large time-series datasets using Python, Pandas, and statistical analysis techniques.
- Trained and evaluated baseline machine learning models to identify trends, generate predictive insights, and support data-driven decision-making.

CERTIFICATIONS

Google Data Analytics Professional Certificate (2025)
